

Participating Home Performance Contractors

Below please find the list of 2016 Participating Contractors for the Home Performance with Energy Star Rebate program. The Insulation Contractors are all certified by the Building Performance Institute (BPI). This high level certification is required in the Home Performance rebate program.

If you are installing a new furnace, boiler, air conditioner or water heater, you must use one of the below HVAC contractors. If you are having a new air conditioner installed, your contractor must provide you with a completed Quality Installation form. Please keep the completed form until your post-work inspection. Do not mail it into Xcel Energy.

If you have concerns or questions, please contact the Energy Advisor Service at the Neighborhood Energy Connection 651-328-6224 or energyadvisor@thenec.org.
